Response to Notice of Non-Compliant dated February 14, 2007

### LISTING OF THE CLAIMS

1. (currently amended) A mMethod for transmitting text- and/or binary information (short message) in addition to voice information for a talker (if present) and at least one listener of a Voice Group Call, comprising the step of ~~characterized by~~ sending a special, dedicated signal to all listeners and to the talker.
2. (currently amended) The mMethod according to claim 1, ~~characterized in that~~ wherein the message is sent in unacknowledged mode.
3. (currently amended) The mMethod according to claim 1 ~~or 2, characterized in that~~ wherein the special dedicated signal is a short message mobile terminated SM MT.
4. (currently amended) The mMethod according to any of claims 1-3, ~~characterized in that~~ wherein the SM follows the structure of a regular PtP-SMS in parallel to an ongoing PtP-voice- or PtP-cs-datacall.
5. (currently amended) The mMethod according to ~~any of~~ claims 1-4, ~~characterized in that~~ wherein the SM is send from the current talker to the network in form of a short message mobile originated SM MO.
6. (currently amended) The mMethod according to claim 5, ~~characterized in that~~ wherein the SM MO is sent in acknowledged mode.
7. (currently amended) The mMethod according to ~~any of~~ claims 1-6, ~~characterized in that~~ wherein the SM will be addressed by an associated Voice Group Call reference.

Response to Notice of Non-Compliant dated February 14, 2007

8. (currently amended) The mMethod according to any of claims 1-7, ~~characterized in that wherein~~, if the current talker is sending a SM and during the sending the talker intends to end his speaking, the MS will hold the uplink until the SM is sent completely to the network.
9. (currently amended) The mMethod according to any of claims 1-8, ~~characterized in that wherein~~ a SME in the network requests the SC to send a SM to the members of a VGC, the SC interrogates the GCR in order to retrieve the routing information of an Anchor-MSC for this VGC, the SC forwards the SM to the appointed Anchor-MSC for this VGC, the Anchor-MSC itself forward the SM to all base station subsystems BSS partaking in the VGC and in addition to all Relay-MSCs, the Relay-MSCs send the SM to all respective BSS for this VGC, which transmit it to the listeners.
10. (currently amended) The mMethod according to ~~any of~~ claims 1-9, ~~characterized in that wherein~~ the current talker sends a SM via a SACCH of the respective uplink-channel on the resource controlling signaling connection control part SCCP to the MSC analogue to the sending of a PtP-SMS via the respective SACCH, where the destination of the SM can be either a MSISDN or a VGC-REFERENCE.
11. (currently amended) The mMethod according to ~~any of~~ claims 1-10, ~~characterized in that wherein~~, by using the MSISDN the SM is forwarded to the SC and there it is handled according to normal PtP-SM.
12. (currently amended) Method according to ~~any of~~ claims 1-11, ~~characterized in that wherein~~, by using the VGC-Reference the SM is handled as accordingly the described procedures.
